Skills

- Information Security Management & Governance
- Cloud Security (AWS / Azure)
- SaaS & Identity Security (GSuite, Okta, Slack)
- Compliance & Risk Management (GDPR, PCI DSS)
- Incident Response & Security Operations
- Vendor Risk & Third-Party Governance

Senior IT and Information Security leader with experience designing and executing cloud security, SaaS governance, compliance, and incident response programs for distributed and remote-first organizations. Strong track record of aligning security and IT initiatives with business objectives while operating in global environments.

Work History

2024-09 - Current

Senior Technical Lead

Trianz Holdings Private, Hyderabad, India

- Lead multi-cloud strategy and security initiatives across **AWS, Azure, and OCI**, enabling scalable, secure, and compliant cloud adoption for distributed teams and client environments.
- Provide technical and people leadership to cloud and security engineers, driving delivery excellence, workload prioritization, mentoring, and continuous skill development in a remote setup.
- Define and enforce **cloud governance frameworks**, including landing zone architecture, IAM models, security baselines, and compliance guardrails aligned with organizational and regulatory requirements.
- Partner closely with **architects, product owners, and business stakeholders** to translate business requirements into actionable cloud and security roadmaps.
- Own cloud security posture management, including **threat detection, incident response coordination, vulnerability management, and audit readiness** across multi-tenant environments.

- Drive **infrastructure and security automation** using tools such as Terraform and Python to improve deployment consistency, reduce manual effort, and lower operational risk.
- Oversee and support cloud modernization, migration, and security enhancement initiatives, ensuring delivery of measurable outcomes related to security posture, reliability, and operational efficiency.
- Act as a trusted advisor to leadership on cloud risk, security strategy, and investment decisions in a remote, global delivery model.

2023-09 - 2024-07

Consultant - Cloud Architect

ADP

- Led cloud architecture and security initiatives across **Azure and OCI**, enabling secure, scalable, and compliant multi-cloud environments.
- Defined and enforced **cloud governance standards**, Azure Policy frameworks, and **CIS-aligned security baselines** to strengthen enterprise security posture.
- Designed and guided **hybrid connectivity strategies** using ExpressRoute, FastConnect, VPNs, and private access patterns.
- Partnered with product, security, and architecture teams to influence cloud design and modernization decisions.
- Guided engineering teams on **secure workload onboarding** and cloud best practices.
- Ensured compliance, performance optimization, and seamless cloud service integration across business units.

2023-02 - 2023-09

Senior-Network & Security Specialist

Intuitive Technology partners

- Supported cloud security operations across **AWS and Azure**, ensuring secure access, network protection, and policy compliance.
- Implemented and monitored security controls including **IAM, network security rules, encryption, certificates, and traffic protections**.
- Collaborated with application, network, and platform teams to secure cloud workloads and enforce governance standards.
- Investigated cloud security incidents, performed root-cause analysis, and implemented corrective actions to reduce risk.
- Improved cloud security posture through continuous monitoring, logging, and compliance alignment.

2022-10 - 2023-02

Senior Engineer - Network Security

Cloud4c Services Private Limited, Hyderabad

- Supported enterprise cloud and security operations, providing leadership in resolving escalated network and security incidents.
- Participated in customer requirement discussions and contributed to landing zone design, cloud migration planning, and architecture recommendations.
- Oversaw firewall governance and policy changes across Palo Alto, Fortinet, Cisco, Juniper, and Check Point platforms.
- Ensured compliance, stability, and secure operations across hybrid cloud environments through proactive monitoring and risk mitigation.

- Collaborated with cross-functional teams to standardize security configurations and streamline operational workflows.

2020-04 - 2022-10

Solution Engineer (F5) - GBS IND

Bank of America, Hyderabad

- Supported cloud security operations across AWS and Azure, ensuring secure access, network protection, and policy compliance for enterprise workloads.
- Implemented and monitored security controls, including IAM policies, NSGs, encryption, certificates, and traffic security configurations across cloud environments.
- Worked closely with application, network, and platform teams to secure cloud-hosted applications, strengthen access models, and enforce governance standards.
- Led incident investigations related to cloud security events, performed root-cause analysis, and applied corrective measures to reduce future risks.
- Assisted in optimizing cloud configurations, improving posture through continuous monitoring, logging, and compliance alignment.

2018-03 - 2020-04

Cyber Security Analyst

Cognizant Technology Solutions, Hyderabad

- Delivered cloud security operations across Azure and AWS, supporting secure VPC/VNet configurations, IAM models, and traffic protection.
- Implemented and managed security policies, NSGs, route controls, VPN configurations, and encryption mechanisms across cloud environments.
- Deployed and maintained Palo Alto cloud firewalls, enabling secure access, threat prevention, and compliance enforcement across multiple cloud workloads.
- Performed incident analysis, log review, and vulnerability remediation to improve cloud security posture and reduce operational risk.
- Collaborated with application and infrastructure teams to onboard workloads securely and align them with cloud governance standards.

2014-11 - 2018-01

Network Security Engineer

Aricent Technologies, Hyderabad

- Provided L2 support for network and security operations in customer LAN/WAN environments.
- Worked on FortiGate firewalls, configuring security policies, IPsec VPNs, and handling change requests via ITIL/ITSM processes and BMC Remedy.
- Supported incident, change, and release management, ensuring SLA adherence and coordination across teams.
- Basic exposure to Cisco ASA, Juniper firewalls, IDS/IPS, and SIEM tools

Education

2010-06 - 2014-06

Bachelor of Technology: Information Technology

Avanthi Institute of Engineering & Technology - Hyderabad

Aggregate: 75%

2008-06 - 2010-06

Intermediate

Narayana Junior College - Hyderabad

Aggregate: 75%

2007-06 - 2008-06

SSC

St. Pious X Girl's High School - Hyderabad

Aggregate: 71%

Certifications

Certified Azure solution architect- AZ 305 - 2024

Certified on JNCIA-Junos

Certified on ITIL Foundation 2011
